1 LONG-RANGE RIGHTS-OF-WAY MANAGEMENT PLAN

The Certificate Holder has developed a long-range rights-of-way management plan, called the “Right-of-Way (ROW) and Grounds Maintenance Procedures,” to be used as a standard vegetation management plan during maintenance and operation of their facilities. The most recent version of the Certificate Holder’s plan will be used for the Commercial Avenue Terminal (Terminal).

1.1 Project-Specific Maintenance

In accordance with Original Certificate Condition 4, no herbicides will be used during the construction or operation and maintenance of the Terminal.

No part of the Terminal will be vegetated following construction. Vegetation maintenance will be limited to trimming or removing unplanned vegetation that may self-establish.
